YASH CHAVAN

Mumbai, Maharashtra | chawanyash14@gmail.com | +91 9082484387 | linkedin.com/in/yash-chavan-629a16343 | github.com/YashChavan04

PROFESSIONAL SUMMARY

Third-year B.E. Information Technology student at TCET with a 9.7/10.0 CGPA and a strong interest in Artificial Intelligence, Machine Learning, data-driven applications and software development. Hands-on project experience across Python-based geospatial analytics, predictive healthcare insights, and full-stack application development using React.js, Java and Spring Boot. Currently working as a Web Development Intern at Ascent Labs, applying technical knowledge to assigned project tasks and practical development requirements.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, SQL
Frontend Development: HTML5, CSS3, React.js
Backend Development: Node.js, Express.js, FastAPI, PHP, Spring Boot (basic)
Databases: MySQL, PostgreSQL, MongoDB, Microsoft SQL Server, DuckDB
Data Analysis: Pandas, NumPy, Matplotlib, Power BI
Developer Tools: Git, GitHub, Postman, Docker, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

Web Development Intern | Ascent Labs

November 2026 - Present

- Working on assigned web development project tasks as part of a structured internship.
- Applying frontend and backend development concepts to implement features based on project requirements.
- Building practical experience in understanding task requirements, developing solutions and refining implementations.

PROJECTS

GeoHealth AI - Geospatial Healthcare Analytics & Demand Prediction | Individual Project

Completed

Python, FastAPI, React.js, DuckDB, Pandas, NumPy, Geospatial Analysis, Predictive Modelling

- Designed and developed an individual geospatial healthcare analytics platform to study healthcare accessibility and support data-informed hospital location planning.
- Built analytical workflows to identify and evaluate potential hospital locations using geographic and healthcare-related data.
- Implemented predictive analysis for healthcare demand and patient visits to help estimate service requirements and support infrastructure planning.
- Connected backend services and an interactive frontend to present location-based insights and analytical results.

ExamSmart - Online Assessment Platform | Team Project

Under Development

React.js, Java, Spring Boot, MySQL, Spring Data JPA, REST APIs

- Collaborating with a team to develop a full-stack platform intended to streamline online assessments and student evaluation.
- Contributing to application development across the frontend, backend integration and database-related tasks.
- Working with React.js for the user interface and Spring Boot-based services and REST APIs for application functionality.

Hospital Management System | Team Project

Completed

Java, Spring Boot, MySQL, Spring Data JPA, Hibernate, REST APIs

- Collaborated on the development of a hospital management application, contributing to frontend, backend and database integration.
- Implemented backend functionality using a layered structure involving Controllers, Services, Repositories and DTOs.
- Developed and integrated REST API endpoints and used Spring Data JPA/Hibernate for database operations.

ACHIEVEMENTS

- **Selected for the Internal Round of Smart India Hackathon (SIH) 2026** for the Wildfire Detection and Monitoring project.

EDUCATION

B.E. in Information Technology

2024 - 2028

Thakur College of Engineering and Technology (TCET), Mumbai | University of Mumbai

CGPA: 9.7/10.0 | *Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Machine Learning, Data Analytics*
